

Executive Summary

PgBee Business Growth & Expansion Analytics

Prepared By: Sidharth

Project: PgBee Business Growth & Expansion Analytics

Year: 2026

1. Project Overview

PgBee is a student hostel discovery and booking platform designed to simplify accommodation search for students while helping hostel owners improve visibility and occupancy.

This project evaluated PgBee's beta performance, financial viability, growth opportunities, and expansion strategy using SQL analytics, R analytics, forecasting models, financial modeling, and business intelligence dashboards.

2. Business Problem

Students often face challenges when searching for hostels, including:

- Limited verified information
- Difficulty comparing options
- Time-consuming search processes
- Lack of centralized platforms

Hostel owners face:

- Low visibility
- Vacant rooms
- Inefficient student acquisition

PgBee addresses these challenges by connecting students and hostel owners through a digital platform.

3. Beta Performance Results

The pilot was conducted in **Thiruvananthapuram**, focusing primarily on students from the **College of Engineering Trivandrum (CET)**.

Key Results

KPI	Value
Hostels Onboarded	38
Students Registered	74
Total Bookings	74
Commission Per Booking	₹499
Total Revenue	₹36,926
Total Profit	₹26,926
Profit Margin	72.92%

Conclusion

The beta successfully validated the business model and demonstrated demand for digital hostel discovery and booking services.

4. Analytics Findings

SQL Analytics

Business performance was analyzed using:

- Revenue Analysis
- Funnel Analysis
- Profitability Analysis
- Forecast Dataset Preparation

Key finding:

74 successful bookings generated ₹36,926 revenue.

R Analytics

Statistical analysis and forecasting indicated:

- Positive booking growth trends
 - Expansion potential across Kerala
 - Strong revenue scalability
-

Power BI Dashboard

A business performance dashboard was developed to monitor:

- Revenue
 - Profitability
 - Booking Funnel
 - Customer Metrics
 - Growth Indicators
-

5. Financial Analysis

Revenue Model

Revenue Formula:

Revenue = Bookings × ₹499

Current Revenue:

$74 \times ₹499 = ₹36,926$

Unit Economics

Metric	Value
CAC	₹67.57
LTV	₹499
LTV:CAC Ratio	7.39
Break-Even Bookings	21

Financial Insight

PgBee demonstrates strong unit economics and healthy profitability.

6. Forecasting Results

Forecasting analysis suggests continued growth in bookings and revenue.

Projected expansion is expected to significantly increase transaction volume and commission revenue over the next 24 months.

7. Expansion Strategy

District scoring analysis identified the highest-priority expansion markets within Kerala.

Recommended Expansion Sequence

Rank	District
1	Thiruvananthapuram
2	Ernakulam
3	Kozhikode

Expansion Roadmap

Phase 1

Strengthen Thiruvananthapuram operations.

Phase 2

Launch Ernakulam.

Phase 3

Launch Kozhikode.

8. Revenue Opportunity

Projected revenue potential from expansion:

Expansion Area	Revenue
Thiruvananthapuram	₹74,850
Ernakulam	₹124,750
Kozhikode	₹89,820

Combined Revenue Potential

₹289,420+

9. Strategic Recommendations

Short-Term

- Expand hostel inventory
- Improve booking conversion rates
- Increase student acquisition

Medium-Term

- Launch Ernakulam operations
- Build college partnerships
- Scale hostel onboarding

Long-Term

- Expand across Kerala
 - Enter Karnataka and Tamil Nadu
 - Build a South India hostel marketplace
-

10. Conclusion

PgBee successfully demonstrated product-market fit through its Thiruvananthapuram beta program.

Key achievements include:

- 38 hostel partnerships
- 74 successful bookings
- ₹36,926 revenue generation
- 72.92% profit margin

The analysis confirms that PgBee possesses a scalable, high-margin business model with strong expansion potential across Kerala and South India.

Final Recommendation

Continue expansion within Kerala, starting with Ernakulam and Kozhikode, before pursuing broader South India growth.
